

BROMPTON

A photograph of two women riding bicycles on a city street. The woman on the left is wearing a white jacket and blue jeans, riding a red bicycle. The woman on the right is wearing a grey checkered coat and red pants, riding a purple bicycle and wearing a light green helmet. They are both smiling. In the background, there is a brick building with many windows and a sign that says "DEVONIA ROAD". A person is walking a dog on the sidewalk. The text "Unfold Happiness" is overlaid in large white letters at the bottom of the image.

Unfold
Happiness

A 'magic carpet' for the city. A bike that can take you anywhere. That was our founder, Andrew Ritchie's, vision when he invented the Brompton in 1975, and it's been our guiding light since.

Today, Andrew's original and ingenious 3-part fold is the foundation of every bike. It takes less than 20-seconds to transform the Brompton into a small, compact package that locks together and is easily carried, towed and stored. When unfolded, it has a similar ride position to a full-size bike and small wheels for faster acceleration through the city.

The bikes are handbuilt and quality assured in our London factory. Each frame comes with a 7-year registered warranty. And our ongoing commitment to 'access to parts' means you can upgrade and maintain as and when you need.

Nothing Folds Like A Brompton Folds

The 3-part fold quickly transforms the bike into a small, compact package measuring just 585mm high x 565mm long x 270mm wide. Expertly engineered to stay locked together with all mucky parts tucked away. Exceptionally durable and easily carried, towed or stored. You can take your Brompton on rush-hour trains, pop it in small car boots, stick it in busy hallways, under library desks or the table at your local pizzeria.

4.41 seconds

The Brompton bike with a one-size-fits-all spec.
A robust all-steel frame handmade in London. 3-gears tuned for city riding.

Available selected regions

C Line

The Classic All-Steel Folding Bike

The original design with the 3-part fold, handmade in our London factory since 1975. Compact and robust - it's a seriously engineered bike that's fun to ride.

Although C Line is made to stand up to the rigours of everyday life in the city, owners have taken them on around-the-world trips, on country tours and even to the South Pole, but mainly they are used 364-days a year to improve the day-to-day (we recommend a day-off for an annual service).

P Line

Performance. The Lightweight Transformation.

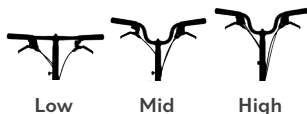

From just 9.65kg

Weighing 1.85 kg less than the C Line model, P Line is lightweight performance, folded and unfolded. This meticulously engineered machine thrives on city roads with its titanium rear frame, forks, and all-new suspension block. Next-level componentry and enhanced portability features make it faster to ride, lighter to carry and easier to move around the city in every way.

Urban

Gears: 4-speed
Handlebar: Low/Mid/High
Mudguards: Included
Lighting: Optional

Fit

The compact 4-speed system* with an all-new 60-gram derailleur is precision-engineered to fit inside the narrow fold.

*Patent-pending

P Line

Next level frame

The P Line titanium rear frame and forks are 700 grams lighter than the all-steel equivalent.

The redesigned suspension block maximises efficiency and responsiveness by shifting your pedal power to improve control and handling performance.

Naturally, shock-absorbing titanium smooths out the road.

You can feel the difference.

The Brompton Can Carry Your Load

The best way to carry anything on your Brompton bike is with a Brompton bag. Like an extension of your bike, every bag clicks into place, sits stable and secure, and is made to last.

Big, small or essentials only. All of our bags work on and off your bike.

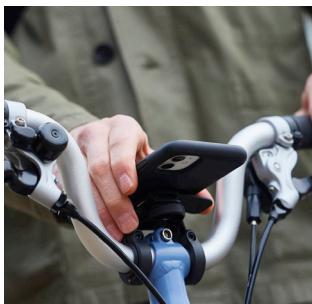

Brompton City Apparel

Brompton X Protected Species

Clothing

Brompton collections, including collaborations with like-minded makers and designers, are designed to perform when you're riding and look the part when you're not.

Brompton Phone Mount

The Brompton Quad Lock® Phone Mount, developed with a 100% perfect Brompton fit. Mounts in the middle and locks your phone in place so that you can ride, view, and navigate the city easily.

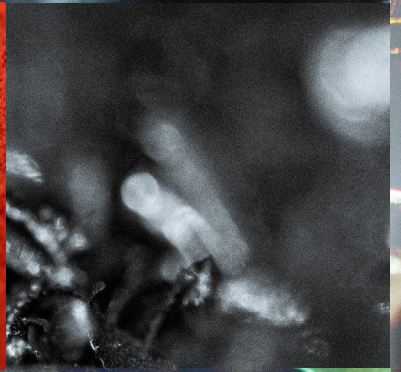

Brompton Toolkit

The award-winning Brompton Toolkit – compact and efficient, just like your bike. Everything you need to fix a puncture and make running repairs or adjustments. Stores invisibly inside the fold, so it's always on hand. You'll find space inside the 'fold' for a spare innertube too.

In our West London Factory, a team of 300+ engineers, designers, skilled fabricators, makers, painters, inventors and manufacturers make the Brompton bikes of today and tomorrow.

Every Brompton bike frame is handbuilt and quality assured with a 7-year warranty, on registration. Our in-house paint facility uses environmentally-friendly powders. We source all our energy through 100% renewable energy or carbon neutral contracts.
